## How to Use this Chart

Teach your children that the same amount of food can be measured many different ways.

Instead of 1/2 cup, have them count 8 tablespoons when you're making a recipe.

Go straight across the rows to find measurements that are approximately equal to each other.

## Cooking and Counting

| Cups <br> (c) | Tablespoons <br> (tbsp) | Teaspoons <br> (spp) | millilitres <br> $($ ml) |
| :---: | :---: | :---: | :---: |
| 1 | 16 | 48 | 240 |
| $3 / 4$ | 12 | 36 | 180 |
| $2 / 3$ | 10 | 30 | 160 |
| $1 / 2$ | 8 | 24 | 120 |
| $1 / 3$ | 5 | 16 | 80 |
| $1 / 4$ | 4 | 12 | 60 |
